

## Pond Safety 'Net'- DIY Installation Booklet

Drill a hole, approximately 25cm above the water level at 0.8m intervals around the circumference of the pond.

If the pond edge has corners ensure that a hole is also drilled into each corner- this in addition to the holes at 0.8m intervals.

Using a hammer, tap an Anchor (B) into each hole until just the eye of the Anchor (B) is visible above the surface.

N.B. Place a screwdriver into the eye of the Anchor (B) whilst tapping the Anchor (B) into the holes. This prevents the eye of the Anchor (B) closing when tapping with the hammer.

Clip a Carabineer (C) into each eye of the Anchors (B).

Position the Carabineers (C) so that the Carabineer (C) clip catch is facing inwards towards the water.

Position the Net (A) over the entire pond surface ensuring that all Carabineers (C) are covered and underneath the Net (A).

Also ensure the squares within the Net (A) are kept as linear as possible (as shown by the arrows in the diagram).

## Pond Safety 'Net'- DIY Installation Booklet

Starting with the corners, clip the Net (A) to the Carabineers (C).

N.B. Whilst still maintaining the linear nature of the Net (A), ensure to pull tightly and tension the Net (A) before clipping each corner.

Select a Carabineer positioned in the middle of the pond, tension the Net and clip to the Carabineer (C). Repeat this process with the opposite facing Carabineer (C).

Repeat the above until all middle Carabineers (C) are connected to the Net (A).

N.B. Whilst still maintaining the linear nature of the Net (A), ensure to pull tightly and tension the Net (A) before clipping the Net (A) to the Carabineer (C).

Clip all remaining Carabineers (C) to the Net (A).

N.B. Whilst still maintaining the linear nature of the Net (A), ensure to pull tightly and tension the Net (A) before clipping the Net (A) to the Carabineer (C).

Cut away the excess Net (A), one full square of Net (A) **beyond** the Carabineer (C).

## Pond Safety 'Net'- DIY Installation Booklet

You should now have a Pond Safety Ltd. Net similar to the one below.

To receive your receipt and guarantee please send four photos (from four different angles) of your completed Net installation.

### **Need Extra Help?**

We can always come and fit your Pond Safety Ltd. Net for you. Please call the office on 01623 438049 or inbox to [info@pondsafety.com](mailto:info@pondsafety.com) to obtain a quotation.
